

# Northeastern Ohio Fertility Center

Office of Dr. Nicholas Spirtos **WE SHARE YOUR DREAM**

## *Top 10 Reasons NEOFC is Different!*

### **1. PERSONAL CARE**

Bigger isn't always better. You are not just a number at the Northeastern Ohio Fertility Center. Our small, yet capable and experienced team is here to ensure that every patient receives personalized and consistent care. Dr. Spirtos treats every patient.

### **2. EXPERIENCE**

Dr. Spirtos has over 28 years of experience in the field of reproductive endocrinology and infertility. He started the first In Vitro Fertilization Center in Akron in 1984. For the best care, nothing beats experience!

### **3. COST-EFFECTIVE TREATMENTS**

Unless requested, cost effective treatment options are always recommended first, as opposed to recommending more expensive treatments, such as IVF.

### **4. ACCESSIBILITY**

Dr. Spirtos is extremely accessible! If you have a problem, you can usually be seen that same day and/or speak with him personally at the office or by cell phone, in the event of an emergency 24/7.

### **5. TIME**

If Dr. Spirtos makes room in his schedule for another patient due to an emergency, he does not "catch-up" on your visit! Dr. Spirtos gives each patient the valuable time they deserve.

### **6. AVAILABILITY**

When it comes to infertility, timing is everything. In order to meet the needs of our patients, our office is open seven days a week (with the exception of Christmas and New Year's Day).

### **7. THOROUGH WORK**

Having a successful pregnancy is the ultimate goal. The best chance in making that happen is to ensure that both partners are healthy. Dr. Spirtos provides a thorough examination to assure just that.

### **8. COMMUNICATION**

Dealing with infertility is always delicate, and communication is the key. Dr. Spirtos and his staff spend a great deal of time talking with patients making sure that they are well informed. He is willing to answer any and all questions.

### **9. TEAM-PLAY**

If Dr. Spirtos discovers an issue that is not in his area of expertise, he will refer his patients to another physician to ensure that they receive the best possible care.

### **10. NEW TECHNOLOGIES**

Dr. Spirtos stays up on the latest technologies. Over the last few years, he has incorporated the use of embryo biopsy and pre-implantation genetic screening (PGS) technologies, as well as surrogacy and egg donor relationships. Dr. Spirtos is open to and has utilized the use of complementary medicine techniques within his practice. He refers patients to qualified practitioners for use of acupuncture, herbal therapies, massage therapy and dietary recommendations.
